LIST OF CONTENTS

NUMBER 1

A. R. deL. Musgrove and **K. J. Maher**	1	Optimum cogeneration strategies for a refrigeration plant
Mahir Arıkol, Gülseren Ünlü İzmir and **Sibel Özdoğan**	9	Survey of industrial energy requirements: findings for the Turkish chemical industry
R. Berber and **E. A. Fletcher**	13	Extracting oil from shale using solar energy
Peter George and **David Van Schaik**	25	The role of small-scale hydro development in northern Ontario
Eric Hirst	33	Creating viable utility conservation/load management programs
G. R. Hadder, S. Das and **R. M. Davis**	45	Refinery investment and naval fuel production
T. Y. Yan	57	An incremental model for coal evaluation—II. Gasification
S. Rahman, M. A. Khallat and **Z. M. Salameh**	63	Characterization of insolation data for use in photovoltaic system analysis models
Gene Tyner Sr, Robert Costanza and **Richard G. Fowler**	73	The net-energy yield of nuclear power
Kurt Wickman	83	The energy market and energy policy in Sweden 1965–1984
A. J. Appleby	97	Molten carbonate fuel cells in a future United Kingdom context
Willett Kempton	107	Residential hot water: a behaviorally-driven system
Software Survey Section	I	

NUMBER 2

Ho-Ming Yeh, Shau-Wei Tsai, and **Nien-Tung Ma**	115	Energy balances in double-effect wick-type solar distillers
Donald J. Parks, Kent L. Scholl, and **Edward A. Fletcher**	121	A study of the use of Y_2O_3 doped ZrO_2 membranes for solar electrothermal and solarthermal separations
Martin O. Stern	137	Energy storage in magnetic fields
B. W. Ang and **S. T. Oh**	141	Transport and traffic management schemes and energy saving in Singapore
J. A. Carvalho Jr, C. Bressan, and **J. L. G. Ferreira**	149	Analysis of hydrazine as an alternate source of energy

Akio Suzuki	153	General theory of exergy-balance analysis and application to solar collectors
Asok K. Jana, Sharmila Roy, and **Benoy B. Bhowmik**	161	Studies on storage photoelectrochemical cell consisting of phenazine dye–EDTA and different redox couples
B. H. Chen and **W. H. Huang**	167	Second-law analysis for heat-transfer enhancement on a rib-type turbulence promoter
Enrique Rotstein	177	Exergy analysis and thermodynamic accounting of utilities
Sidney Loeb	183	Compressed air–brine energy storage
V. Bahel, H. Bakhsh, and **S. Zubair**	191	Performance degradation of an air-conditioner caused by cyclic operations
Göran Wall	197	Exergy flows in industrial processes
Corrigenda	209	
Software Survey Section	I	

NUMBER 3

Editorial	i	
John H. Herbert	211	Institutional and economic factors in residential natural gas markets in the Northeastern United States between 1960 and 1984
C. P. Li, D. F. Wiesenhahn, and **S. S. Penner**	217	Production of toxic equivalents to 2, 3, 7, 8-TCDD in municipal-waste incinerators (MWIs)
D. F. Wiesenhahn, C. P. Li, and **S. S. Penner**	225	A simplified model for dioxin and furan formation in municipal-waste incinerators
Christos A. Frangopoulos	239	Functional decomposition for optimal design of complex thermal systems
E. Taşdemiroğlu	245	Geothermal energy potential and utilization in Turkey
Hashem Akbari, Mashuri Warren, Anibal de Almeida, Deborah Connell, and **Jeffrey Harris**	253	Use of energy management systems for performance monitoring of industrial load-shaping measures
Robert M Wirtshafter	265	Energy-conservation standards for buildings in China
M. N. Nahas, A. S. Mohamad, M. Akyurt, and **A. El-Kalay**	275	A windmill with cam-articulated blades
Darwin C. Hall, Jane V. Hall, and **David X. Kolk**	281	Energy in the unit cost index to measure scarcity

Dieter J. Hohenwarter and **Manfred Heindler** 287 New power and energy output of the German LWR nuclear power system

Software Survey Section I

NUMBER 4

A. Steinfeld and **E. A. Fletcher** 301 A solar receiver–reactor with specularly reflecting walls for high-temperature thermoelectrochemical and thermochemical processes

Daniel G. Hotard 313 A comparative analysis of crude oil life-cycle models

R. D. Palumbo and **E. A. Fletcher** 319 High temperature solar electrothermal processing—III. Zinc from zinc oxide at 1200–1675 K using a non-consumable anode

G. Restuccia, V. Recupero, G. Cacciola, and **M. Rothmeyer** 333 Zeolite heat pump for domestic heating

Lawrence B. Gratt and **David W. Layton** 343 Health and environmental impacts of future aluminum–air battery-powered electric vehicles

Kapil Thukral 357 India's oil policy: the dilemma for self-sufficiency in refining capability

Sharad M. Lele and **D. K. Subramanian** 367 A hydro–wood net-energy approach to hydro project design

J. D. Pandya, K. K. Ghosh, and **S. K. Rastogi** 383 A phosphoric acid fuel cell coupled with biogas

Note
S. S. Penner 389 Relation between toxic inputs and dioxin and furan outputs for municipal-waste incinerators (MWIs)

Software Survey Section I

NUMBER 5

John H. Herbert 393 The development of residential natural gas markets in the East North Central U.S.A. since 1940

Edward Vine, B. K. Barnes, and **Ronald Ritschard** 401 Implementing home energy rating systems

P. Gandhidasan and **K. N. Ramamurthy** 413 Thermal performance analysis of pneumatic structures

D. H. Eunilkim 421 Reduction and identification of thermal discrete transfer functions

Paolo Vestrucci and **Augusto Grazioli** 431 Cogeneration–heat-pump system optimization through simulation analysis

M. F. El-Refaie 445 Generation of the dynamic input profile to solar collection systems

Marcelo Castier and **Krishnaswamy Rajagopal** 455 Thermodynamic analysis of an alcohol distillery

Software Survey Section I

NUMBER 6

S. S. Penner and **M. B. Richards** 461 Oxidation of nuclear-reactor-grade graphite

Howard S. Geller, José Goldemberg, José Roberto Moreira, Roberto Hukai, Claudio Scarpinella, and **Mamiro Ysohizawa** 469 Electricity conservation in Brazil: potential and progress

Bruce E. Tonn and **Dennis L. White** 485 Patterns of residential wood and electricity use: results from the Hood River Conservation Project

M. N. Nahas, A. S. Mohamad, M. Akyurt, and **A. El-Kalay** 499 Windmills with articulated blades

Johan Claesson and **Per Eskilson** 509 Conductive heat extraction to a deep borehole: thermal analyses and dimensioning rules

Chu-Jun Gu and **Lan Lin** 529 A heat–power cycle for electricity generation from hot water with non-azeotropic mixtures

Software Survey Section I

NUMBER 7

G. R. Hadder, S. Das, R. Lee, and **R. M. Davis** 537 Navy jet fuel production during a military mobilization scenario

Ho-Ming Yeh and **Young-Chun Ting** 543 Efficiency of solar air heaters packed with iron filings

E. Taşdemiroğlu 549 Hydroelectric power potential and its use in Turkey

S. C. Saxena 557 Mathematical models for fluidized-bed coal combustion and sulfur retention

Software Survey Section I

NUMBER 8

A. Steinfeld and **E. A. Fletcher**	609	Solar energy absorption efficiency of an ellipsoidal receiver–reactor with specularly reflecting walls
John Haraden	615	An economic appraisal of magma power generation
M. O. Onyekonwu	619	The effects of relative permeability characteristics and thermal conductivity on *in situ* combustion performance
M. Zaheer-uddin and **P. Fazio**	625	A numerical model for optimal control of a heat-pump/heat-storage system
Paul S. Komor and **Lyna L. Wiggins**	633	Predicting conservation choice: beyond the cost-minimization assumption
A. M. R. Al-Marafie	647	Assessment and prospects for energy resources in Kuwait
S. K. Chou and **Y. K. Lee**	657	A simplified overall thermal transfer value equation for building envelopes
S. Ramesh, Bhaskar Natarajan, and **Gopika Bhagat**	671	Peak load prediction using weather variables
Software Survey Section	I	

NUMBER 9

Chih Wu	681	Power optimization of a finite-time Carnot heat engine
John Haraden	689	Dissolution of CO_2 in geothermal fluids
Awad R. Mansour	691	Prediction of thermophysical properties of gas turbine combustion gases using the Mansour–Najjar equation of state
B. W. Ang and **C. M. Yap**	697	The use of growth curves in forecasting interfuel substitution processes
A. R. Mannaa, M. A. Ghazi, and **H. A. Gari**	709	Energy management and controls of a solar-powered, fuel-assisted Rankine engine
A. Akbarzadeh and **E. Shayan**	719	A passive method for setting up a density gradient
Xianpei Yin, Keith W. Hipel, and **Niels C. Lind**	725	Conflict analysis of the LNG terminal siting dispute in The Netherlands
Dhanes Charoensupaya and **William M. Worek**	739	Parametric study of an open-cycle adiabatic, solid, desiccant cooling system
Software Survey Section	I	

NUMBER 10

V. C. Sharma, A. Sharma, and P. Ilenikhena	749	Chemical oxidation and spectral selectivity of austenitic stainless steel AISI 321 (for use in solar-energy applications)
Benoy B. Bhowmik and Asok K. Jana	755	A thin-film solar cell consisting of phenosafranin in a polymer matrix
E. Taşdemiroğlu	761	Sustainability of fossil fuels and alternative energies for Turkey
Steve Thomas	767	Power-plant life extension
Manuel Martinez	787	Energy diversification priorities for the Mexican electrical sector
Software Survey Section	I	

NUMBER 11

Charles A. Goldman, Kathleen M. Greely, and Jeffrey P. Harris	797	Retrofit experience in U.S. multifamily buildings: energy savings, costs, and economics
P. Khummongkol, P. Wibulswas, and S. C. Bhattacharya	813	Modeling of a charcoal cook stove
E. Taşdemiroğlu	823	Theoretical study of solar ponds for space heating in diverse climatic conditions of Turkey
Alan K. Meier and Bruce Nordman	833	A thermal analysis of the model conservation standards for new homes in the Pacific Northwest U.S.A.
Software Survey Section	I	

NUMBER 12

S. S. Penner, D. P. Y. Chang, R. Goulard, and T. Lester	845	Waste incineration and energy recovery
J. Owens and H. Wilhite	853	Household energy behavior in Nordic countries—an unrealized energy saving potential
Hassan E. S. Fath and Hameed H. Hashem	861	Energy use and efficiencies in the Arab countries
Hassan E. S. Fath and Hameed H. Hashem	871	The nuclear energy alternative in Arab countries

Notes

Jeffrey L. Small 883 Comments on "Air Pollution Implications of Increasing Residential Firewood Use" by Frederick W. Lipfert and John Lee, *Energy* **10**, 17 (1985)

C. E. Okeke and **C. I. Elekalachi** 885 Design, construction and characterization of a solar concentrator (cooker) using locally available materials

Software Survey Section I
